

Creation/Evolution

Connecting:

1. Growing up, what were you taught about the origins of life (by parents/school/church)? How has that changed as you've grown older?
2. What is a difficulty some people have in accepting a Creator God?
3. Read Colossians 1:15-17. What do you think it means in v.17b when it says about Jesus that "he holds all creation together"?
4. Are you comfortable with the idea that there are some things we cannot fully know? Do you think the origin of the human life could be one of those things?
5. Read Romans 1:20. How does God's Creation reveal God's "invisible qualities" to us? How do we see Him in His Creation?
6. Which of the theories presented in the sermon most appeals to you? (literalist, theistic evolution, gap, day-age, framework) Why?
7. In addition to "God is the Creator", are there any other things from today's sermon that you would put on the list of essentials?
